The Grange Hotel

Venue

The 3rd International Conference on Protection against Overtopping will take place from 6-8 June 2018 in the UK's spectacular Lake District National Park.

The Lake District is England's largest National Park and a UNESCO World Heritage Site. It contains England's highest mountains, and includes the biggest (and deepest) lakes as well as many tarns. The National Park also includes some 26 miles of coastline and estuaries. Delegates will have the opportunity to see parts of this spectacular part of the UK as the conference programme includes technical visits across the region.

The Conference will be based at historical Grange Hotel and Spa in picturesque Grange-over-Sands in Cumbria - see the hotel website for more details.

About Protections 2018

HR Wallingford is organising Protections 2018, the 3rd International Conference on Protection against Overtopping, taking place from 6-8 June in Grange-over-Sands in the UNESCO World Heritage Site of the Lake District, UK.

The increasing demand for dam, levee and seawall safety and flood protection has motivated new research and advancements and a greater need for cost-effective measures in overtopping protection as a solution for overtopping concerns at levees, dams and seawalls. This conference will bring together leading experts from practice, research, development, and implementation for two days of knowledge exchange followed by a technical tour of the Lake District including some of the impressive dams which can be found there.

This conference follows the very successful Protections 2016 event, the 2nd International Seminar on Dam Protection against Overtopping which took place in September, 2016 in Fort Collins, Colorado, USA. The inaugural event in this conference series was held during November 2014 in Madrid Spain and attended by participants from 20 countries.

We look forward to welcoming you to the UK.

Call for abstracts

The International Scientific Committee of Protections 2018 welcomes submissions from all areas with relevance to the following technical themes:

- Critical issues related to levees, dams and seawalls
- New developments and advanced tools
- Overtopping protection systems
- Overtopping simulators / test facilities
- Overtopping failure mechanisms
- System design and performance
- Applications and innovative solutions
- Case histories of overtopping events
- Physical modelling techniques and recent studies
- Numerical modelling methods

Prospective authors can submit abstracts via the conference website, www.protections2018.org, until **(13 September 2017) extended to 2 October 2017**.

Authors will be notified of acceptance for either oral or poster presentation by **1 November 2017**. Papers will be published in the e-book of conference proceedings.

Key dates

Abstract submission opens
12 June 2017

Abstract submission closes
(13 September 2017) extended to 2 October 2017

Notification of acceptance
1 November 2017

Draft paper submission closes
15 December 2017

Final paper submission closes
14 March 2018

Conference dates
6-8 June 2018

International Scientific Committee

We are grateful to have the support of a group internationally respected scientists and engineers who have agreed to join the International Scientific Committee, co-chaired by Dr Tim Pullen, HR Wallingford, UK. Further information is available at www.protections2018.org
